#### ERRATA

We wish to draw attention to an unfortunate error that appeared in 'The Interpretation of Quantum Mechanics' by Max Born in the previous Number on p. 106, l. 3, where 'Bohr' should of course read 'Bohm'. We regret making the author appear to have thrown his ally, Professor Bohr, to his opponents.—Ed.

Corrections for 'A Variant to Hilbert's Theory of the Foundations of Arithmetic' by G. Kreisel in the previous Number have been received too late to be included here. They will be given in the next Number.
